

# SAFE ZONE

The green box denotes the Safe Zone. Please keep the most important aspects of your design within this area to ensure it ends up on the final print. The red area is the Bleed Area. The bleed area likely will not show on the final print, but is there as a preventative measure in case of slight alignment variability.

This is a full print product. If you wish you have the towel completely covered with artwork, please make sure you extend your artwork/graphic/background/texture through the red bleed area.

The base of the product is white. Any white within your design will not print, but instead will show the base of the product.
