

DESIGN AREA

The entire template is the design area. The print will not cover the entire product, there will be a blank border around the edges of the mat to give your design room to breathe as well as offer some extra space to allow for protection against any potential printing errors that can occur.

The outdoor mat print color is black which means anywhere that there is a pixel in your design, it will be printed black. Please upload a PNG with transparency. Hide or delete the template layer and/or any other background images to ensure your graphic is the only element being printed. If you do not have transparency in your design, it will print as a black rectangle on the mat and the mockup images will represent this.

Not all mat sizes scale to the same aspect ratio. This is important to know if you plan to apply your own border. The border may not print the same distance from the edge of the product the same for all sizes. Please see the size options mockup as well as read the Best Practices for a better visual representation of this concept.
