

# DESIGN AREA

This template represents the entire print area for this product. There is no safe zone or bleed area present. The scale and location of your artwork will remain in the position you upload it into the app.

This is a sublimated product that does not print white. If you have white in your design, it will show as transparent on the final product. If you need white to show up in your final print, please adjust your artwork to turn white into an off-white substitute.
