

WRAP

SAFE ZONE

The green Safe Zone is where you should keep the most important aspects of your design. Any elements outside of the Safe Zone will end up on the sides or back of the canvas.

The red area on our templates is typically the Bleed Area. In this instance, the red on the template represents the wrap of the canvas. The wrap is considered the sides and back of the canvas.

Please use hi-resolution graphics and design elements as we print what is submitted to us. Although there is a subtle canvas texture, there is not enough to hide poor quality imagery.
