

SAFE ZONE

Keep the most important details within the green Safe Zone to avoid having them cut off during the printing process.

Must fill the entire art board (including the red Bleed Area) if you want the product completely covered with your design. The base of the product is white - if you have blank areas within your design it will be represented as white.

The black circle at the top left is the location of the grommet. No artwork will be present in this area so be mindful of important information in your design - Please keep that information a safe distance from this location.
