

SAFE ZONE

The green Safe Zone is where the most important aspects of your design should reside. If you have elements outside of this area, we cannot guarantee they will be on the final print.

The red area is the Bleed Area. This will likely not show on the final print, but is there in case of potential alignment errors. Please design through the Bleed Area to ensure there are no blank spots on the final print.

The base of the product is white. If you have transparency within your design, it will show as white on the final product.
